- Anti-diarrhea tablets
- Stomach tablets
- Plasters and disinfectant

Be Sustainable

- ✓ Bring re-usable shopping bags with you.
- ✓ Bring your own shampoo and shower gel to avoid opening hotel products. Take these home with you as well, even if they are almost empty.
- ✓ If you want to reduce plastic use even further, you can buy solid shampoo and shower gel and keep it in a box.
- ✓ Use sunscreen that will not damage corals.
- ✓ If you are going to spend plenty of time in the water (e.g. when snorkelling) then wear a long-armed UV shirt in order to reduce the amount of sunscreen that ends up in the water.
- ✓ Avoid single-use products such as disinfectant wipes or sanitary products; instead, use re-usable alternatives (e.g. menstrual cup, washable make-up pads etc.)
